### **APPLICATION ESSAY**

---

The Chris Cattaneo Memorial Scholarship in Shark Biology provides partial support for college students interning in Mote Marine Laboratory's Center for Shark Research. Long-standing interests in shark biology and the outdoors, academic qualifications, and financial need are strongly considered during the selection process. Please address the following topics in essay format on 1-2 attached pages:

- Your interests and career goals as they pertain to shark biology.
- Your educational background and qualifications for completing a CSR internship.
- Any factors that limit your ability to complete an Internship at the CSR or facilities near your institution (e.g. limited financial resources, limited opportunities for marine research near your college or university).
- Any other factors that make you a good candidate for this scholarship opportunity.
